

ROADMAP TO A

What is Goal of Project Blue World?

Goal is to provide a roadmap, a simple repeatable process, to achieve Global Happiness, continued flow of access to quality of life, services and opportunity for citizens by 2022.

What is current state of quality of life for citizens?

Quality of life requires access to quality products and services, and the skills and resources to manage well. The world is transforming. As new and old technologies link, our world can communicate at a level never provided before. Hardware connects software, connects communities. 2019 is a big year for access and communication, integrations of items such as the Internet of Things (IOT). Since Jan 1, 2017 all regulators, private and government industry leads have issued notifications of standardization, systems, procedure and policy upgrades. Federal and provincial authorities and regulators have laid ground work, are providing systems, policy adjustments and framework to carry out services to citizens providing increased and central access to opportunity. Regional and industry leads are owners to direct and carry out service.

Federal, provincial and industry have identified shortage in skilled resources to carry out required services in some sectors, **in other areas transformation of systems and services cause human resources to transform and move as well,** training, retraining, redistribution of labour is ongoing. Networks are learning to connect online, use remote services. Population is learning to utilize technology. Cloud, IOT, AI, Bitcoin, Blockchain. Systems, Quality Management and leadership trainings, from the basics of numeracy and literacy to skilled technical or professional training, providing service to remote regions and seniors, health and wellness, beds and options for seniors a priority.

What are some options to achieve continued flow of access to service and quality of life?

- A. COORDINATE** community development, standardization of access, products and services federally, provincially, by region and industry.
- B. ENCOURAGE** teams to organize to align spend of private, provincial and corporate dollars to carry out joint community development programs.
- C. UTILIZE** existing networks; schools, healthcare, RM offices... and marketing momentum, social media, to grow awareness of opportunities and service upgrades via region and industry.

Who is approved and built Project Blue World?

Many years of needs analysis from Winnipeg, Manitoba, global and multi industry have led to development and formal refinement of Project Blue World completed January to August 2019.

What can we do next?

SHOWCASE excellence by region and industry,

BUILD culture of performance and improvement for Citizens.

PROVIDE personalized and team services via integrated local and remote product and service networks.

Short term:

Market, communicate and build. **Showcase industry lead organizations** and **coordinated deployment of upgrades and services for citizens**, items like training, systems and infrastructure build based on priority. Aerospace, Healthcare and Education services, palliative beds, numeracy and learning, skilled team members for multiple industries required. Provide easy to navigate, **full access people service cycle from prenatal to palliative**.

Long term:

Rollout by region and industry sectors until all citizens receive access.

Confirm. Check. Celebrate

**Review goal and problem,
adjust, start again.**

Political and industry leads confirming rollout in year 3 (2/01/19), hardware, systems, policy and procedure upgrades, communications and access to opportunities and resources is underway 2019.
